

ARC Fellowship

Applicant Instructions

The Amyloidosis Research Consortium's (ARC) Clinical Fellowship program supports the education and development of amyloidosis specialists with the aim of growing the base of clinicians who can provide expert care and lead scientific advances. The program funds U.S. academic centers to train an amyloidosis clinician-researcher over a one-year period.

Submitting an application

Please thoroughly review all documents before submitting. **Applications will only be accepted through submission to the following email: clinicalfellowship@arci.org and must follow the application outline and instructions.**

1. Using the narrative template provided, please give a brief description of the training opportunities available at your center, both in clinical care and research.
2. Include the following attachments along with the narrative template:
 - a. Biographical sketch of the mentor/co-mentor
 - b. Letter(s) of reference from department chair or other institutional leadership. Letter(s) of support from other multi-disciplinary team members are encouraged but not required.
 - c. Budget (salary, benefits, educational opportunities, etc.) Template provided.
 - d. Graphics/table outlining clinical care rotation and research opportunity requirements

All applications will be treated confidentially and reviewed by ARC staff and external peer reviewers to determine fit with fellowship goals.
